1 Introduction :

Princess Nora University has provided opportunities for external training for its Students who want to have a real work environment experience and gain different skills, face different problems and try to find appropriate solutions. Details T1 has welcomed me as trainee, and they have provided the time and effort to train me.

Our program has many important goals to achieve in this training:

- Experience having real job
- Interact with co workers
- Solving problems
- Web development
- Interact and contact customers

2 LEARNING OUTCOMES OF INTERNSHIP:

After taking tours and getting to know the place we started working on the first assignment which was to create a web store using WordPress

I talked to my supervisor, and I took the requirements that the customer wanted and started to search about WordPress, and I noticed how easy it was to create a whole website without the need of writing a 1000 line of code

Whenever I needed anything I would search for it or ask anyone for help and asking for help used to be an issue for me I could never ask anyone for help except if I really can't do anything without the help they could provide I always have been nervus and couldn't talk much to anyone except my close friends and family this training experience have helped my social experience a lot .

The customer didn't ask for a lot he asked me to choose the colors and the design and he chooses things like the names of the products and the size .

We had an issue with the cart and I asked someone expert for an advice online she helped me a lot the problem was with the theme I selected it had an issue and she helped me to change it to another theme .

It is a multi platform website you can open it on your phone, iPad, laptop.

This is the link to the website

https://goodnewss.net/

After finishing the website, we started working on assignment 2 which was to create an app for the company using Thinkable website but we had an issue using it, it was extremely hard to use it was not easy at all and it wasn't user friendly so we Decided that we are going to use it as a prototype for the app and when we finished it we showed it to the supervisor mohammed and he liked it and I started looking for a company to help creating the app I found a company called topline I talked to them and we had a meeting with them they agreed to make a website instead of an app at the end.

This is the prototype

هذا العطر سيقلب موازين ايامك بحيث ستحصل يومياً على جرعة الفخامة
تتميز افتتاحية العطر بنفحات الخزامى و إبرة الراعي والبرتقال وصممنا قلب العطر بالقرفة السيلانية الفاخرة واجود انواع والورد والباتشولي ليتناغم مع الفانيليا ليجعل كل رشة من هذا العطر بصمة لمناسبتكم الخاصه وفريدة من نوعها ولا يمكن ان تتجاوزها بسهولة، لذلك ننصح محبي عطور البتشولي بتجربة عطرنا المميز باتشولي لاقون.

Fig 20

The second website that I edited is this
https://clefashion.com/

I couldn't find photos for the before and after, but this is the code
First section for the background to change it to black
Second section to design the product listing in the home page, the border, and the color
Finally, the third section for the background of the product page

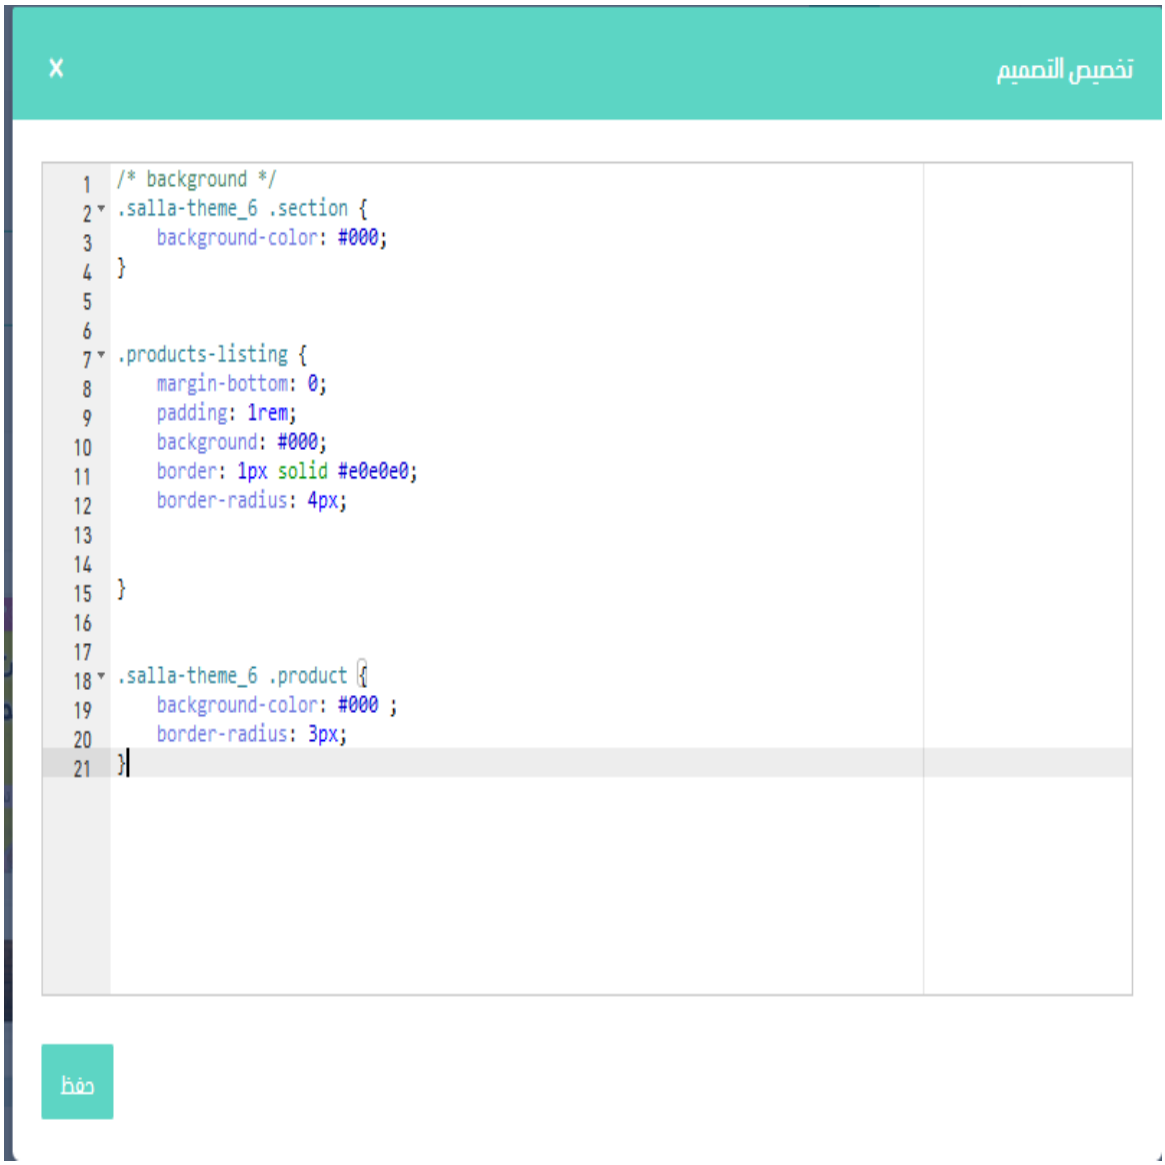

Fig 21

Assignment 4 is to update the plugins of the company website and update some information
And to make the website show on the first page if anyone looked for
"ديتيلز تي ون"

First, I updated the old email to a new one

Fig 22

Fig 23

I updated this section too so any message can go to the new email

Fig 24

This Is to show the website in the first page of the search

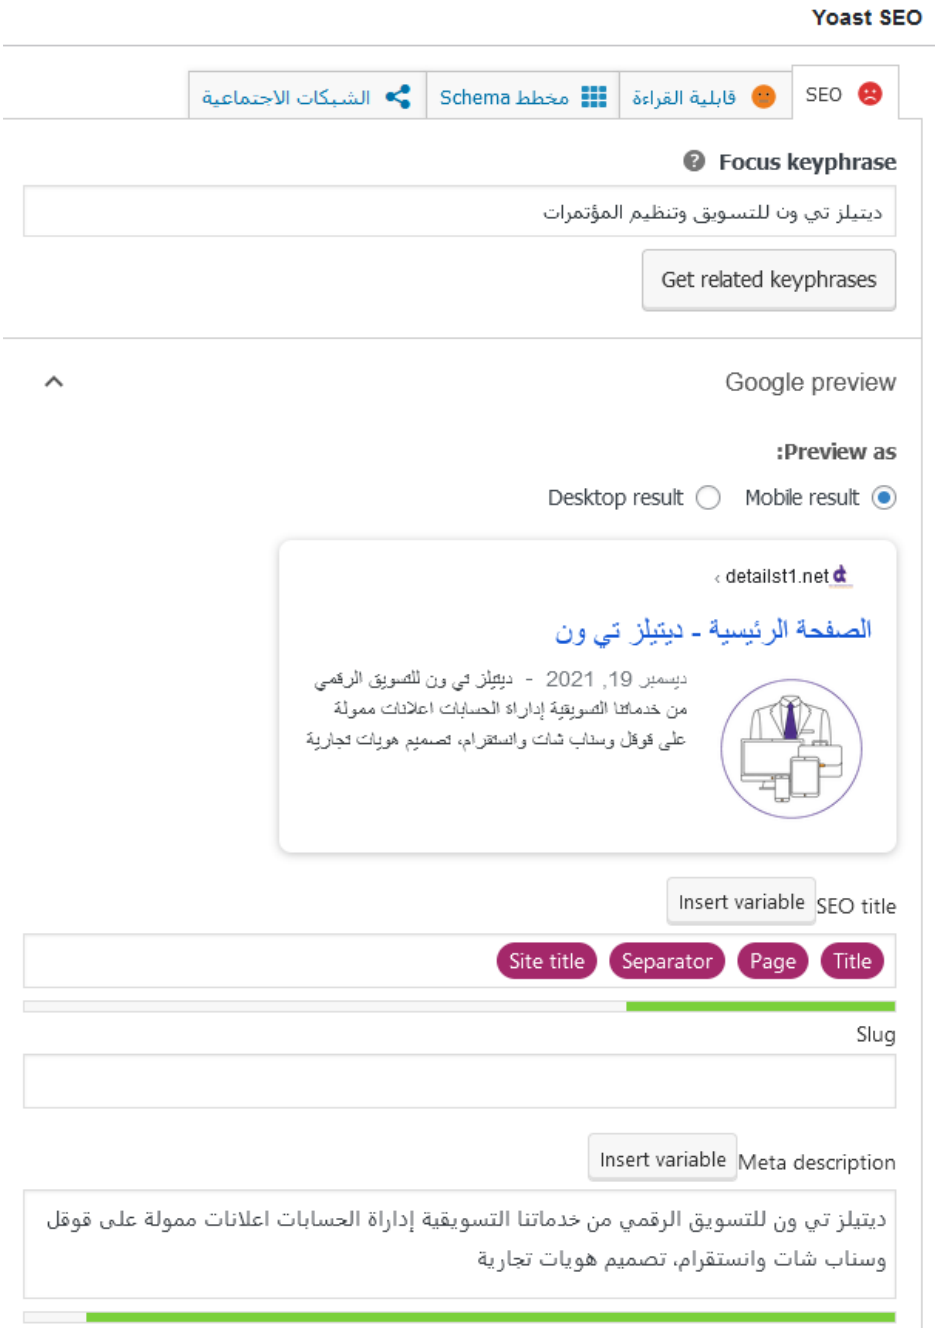

Fig 25

Updated the plugins of the website the elmentor couldn’t update because it wasn’t legit and we didn’t need it
So I just deleted it

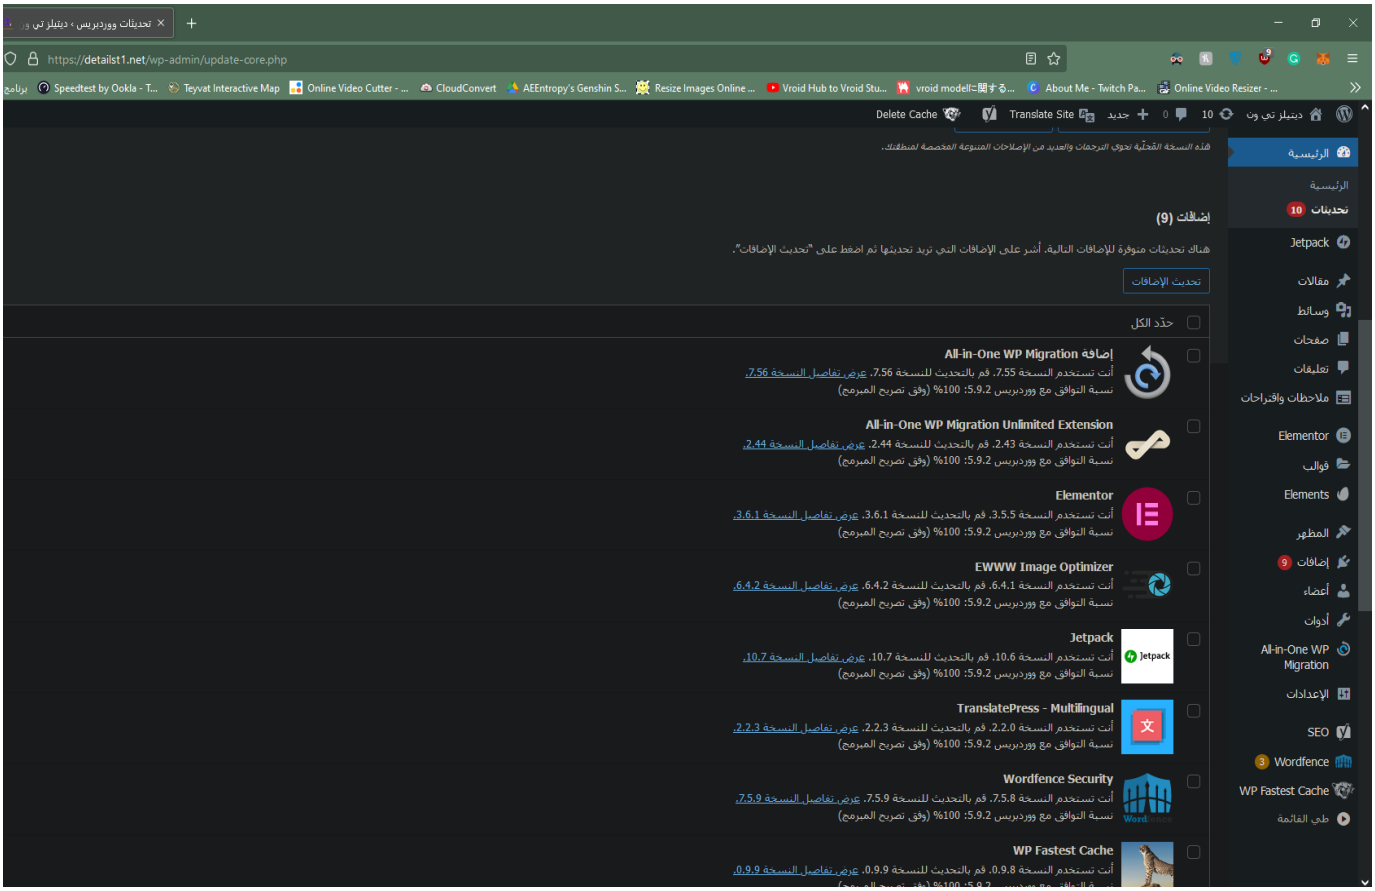

Fig 26

We also edited some photos that was old to new once
